

RECYCLED POLYPROPYLENE MULTIFILAMENT YARNS

HIGH PERFORMANCE REDUCED IMPACT

Polypropylene yarns incorporating post-consumer recycled content, designed to reduce environmental impact without compromising performance.

Mechanical recycling

- Up to 70% recycled content
- Post-consumer plastics
- Reduced waste

Chemical recycling

- 100% recycled (pyrolysis oil)
- Virgin-equivalent quality
- Circular feedstock

No compromise in performance

- Same performance as standard PP
- Long service life
- Industrially proven

High-performance features

- High tenacity up to 7 g/den
- UV resistance & color fastness
- Flame retardant
- Antibacterial
- Low shrinkage

Technical range

- 400–6000 den
- Flat
- Twisted
- Intermingled
- Air-jet textured (COSLAN)
- 500+ colors
