

OXO-BIODEGRADABLE POLYPROPYLENE YARNS

FOR ENVIRONMENTALLY RESPONSIBLE POLYPROPYLENE PRODUCTS

- The yarn will totally degrade and disappear in a short timescale, leaving no fragments, no methane and no harmful residues.
- Degradation will leave nothing more than Water, Carbon Dioxide and a very small amount of Biomass.
- Successfully tested for Soil-Safety and Eco-Toxicity.
- Compostable, certified Food Safe.
- Adjustable product life.
- Degradation is accelerated by sunlight, heat and stress.
- Degradation does not need a biologically active environment.

Available in natural color in all range of deniers and yarn types produced by polisilk, including high tenacity.
